zefiro™ ARCHWIRES

With technology advancement, the dream of having two wire sizes or materials built into the same archwire comes into reality

- The anterior segment is thicker to maintain torque while the posterior segment is thinner for less friction during retraction.
- Joining hook could be used for elastics, coils or lacebacks.
- Use 16x22 & 17x25 for 18 slot brackets & 19x25 & 21x25 for 22 slot brackets.
- **5 wires per pack.**
- Available in 4 different combinations of materials.

	Inches	Size mm	16x22/16x16	17x25/16x16	19x25/16x16	21x25/18x18
SS Anterior SS Posterior	Lower	24	13-610-100	13-610-104	13-610-108	13-610-112
	Lower	26	13-610-101	13-610-105	13-610-109	13-610-113
	Upper	34	13-610-102	13-610-106	13-610-110	13-610-114
	Upper	36	13-610-103	13-610-107	13-610-111	13-610-115
